Partnered with Doane University, Little Priest Tribal College Offers First Time Ever Associate Degree in Cannabis Studies in the State of Nebraska

On August 31st, the Winnebago High School Girls Volleyball teams played a home game against Tri-County North-east. Pictured is Winnebago Varsity’s #42 Lakisha Robinson in action with the serve. (Photo courtesy of Trina Kearnes)

The Winnebago Cheerleaders did an awesome job getting the crowd excited during the football game on Friday, August 27th. Pictured is a group photo of the Winnebago Varsity Cheerleading Squad! (Read more at our website). (Photo taken by Bethani Redhorn)

On behalf of the Little Priest community, we are excited to announce a new program coming to the tribe. The Ho-Chunk Farming Program is going to help the college become a leader in bringing that education to the reservation. (Photo courtesy of Trina Kearnes)

For: Children K-6th Grades
(Kindergarteners must be with a parent/guardian)
When: Monday-Thursday
Time: 3:40pm-4:30pm

Deadline: August 27th, 2021

For more info contact Whirling Thunder Wellness Center at 844-568-6421. Sign up forms will be at the reception desk of WITWC
Winnebago Indians Football Team Back in Action

Winnebago, NE – On Friday, August 27th the Winnebago Indi- ans hosted the Cheyenne Eagle Butte (C.E.B.) “Ohitika” meaning brave in the Lakota Language. Both teams had to be brave to withstand the heat. The rain that was pouring down with the sunshine in the afternoon made for some soggy and hot temperatures on the all-turf field.

For the sake of the fans in the stands and the players playing their hearts out during the hottest part of the day, kick off was at 2:00 p.m., they only played two quarters. We were not able to get the reasons for the game being called but it had to do with the Winnebago Indians football team putting up 41 points and not allowing C.E.B. to score at all. This is the 3rd year for the All- Nations Football League which is comprised of a majority of all na- tive schools. Winnebago Indians joined this league in 2020 and earned their way to the champi- onship game.

This year there are more teams and two classes. The A class and the B class, Winnebago aligned with the A class.

We are the smallest A class team in the league”, said head coach, Adam James. The bigger schools include Pine Ridge which has a student population of 750.

The Winnebago Indians football team had around 34 players who tried out for the team this year.

At the game, new Quarterback Zaaden Bernlie looked in form for the first outing of the season. He was able to do some QB keepers for positive yardage and also managed to throw a few big runs for the Indians.

The biggest showing was Sophomore Indians running back Antrell Harlan also known as the A-Train. He broke off two 50+ yard touchdown runs. The Winnebago Indians defense only allowed one big play but it came late in the second quarter with some of the younger players in. The Indians were also surpris- ingly able to kick a couple of extra points in. It’s been years since Winnebago had an extra point kicker.

The Winnebago Indians seem to not miss a heat coming out of their historical run last year.

The next home game is against Class B team and reigning all na- tions champions Tiospa Zina.

This game will be a true test for the Winnebago Indian Football team.

We at the WIN predict the fi- nal score of the Tiosa vs Winnebago Football Game to be 28-31 for Winnebago.TZ graduated their whole team last year. May and Indians are pretty deadly at the QB and Running back posi- tions. Winnebago will have to play a good game. Come support the Winnebago Indians on Friday, September 10th at 5:00 PM. Go Big Blue!

Winnebago Indians back in action
Hello everyone! My name is Tyler Snake, I am a new part of the Winnebago Indian News team, and as the Office circulation manager I will write into our introduce myself and share some about myself. I am an enrolled member of the Winnebago tribe, and I am a new part of the Winnebago named Jaiden Snake. In my free time I love to work-out and any other creative things. I love to create hobbles like beading, I am excited to learn new skills in a different environment. Therefore, we offer our office thrice! Thank you for reading.

What's the difference between mold and mildew? And more importantly, what can I do to prevent it? The difference between mold and mildew is a fungous that exists in nature to grow, like mold, but more than mold, it can grow on almost any organic material that mold -such as fallen leaves and leaves -where -with similar impact your health in the same long exposure time, mildew can turn brown or gray. With a mold pene- tration of 50% will help to prevent mold. For mold to grow, it needs moisture - Mold just loves damp areas. How do you prevent mold? For mold to grow, it needs moisture - Mold just loves damp areas. How do you prevent mold? For many years our Tribal leaders were saying we cannot afford one and it costs too much to operate. Not to long ago a read in the WN issue that - think they, hit that one billion dollar mark. Please don’t hire a Tribal member to work the organic material that mold -with similar impact your health in the same long exposure time, mildew can turn brown or gray. With a mold pene- tration of 50% will help to prevent mold. For mold to grow, it needs moisture - Mold just loves damp areas. How do you prevent mold? Selecting Trees
With September upon us, it’s time to think about tree planting. If tree selection is on your to do list, putting the effort and time into researching what trees to plant pays off in a tree canopy that nets long-term benefits in shade, beauty, and stabilization, and stormwater mitigation.

Start by taking an inventory of what is already there—not just what is in your yard but in the neighborhood as a whole. Bring the sixth person on your block to plant the same tree in the yard means loss of significant tree cover when an insect or disease wipes them out. (Think of the emerald ash borer with ash trees.) Diversifying trees in a landscape builds resiliency and mitigates the need for treating every single tree when a species-specific problem strikes.

Next, seek the input from tree people. Not tree people who blog from their desk far across the nation or the state, but tree people from your region, who have experience in troubleshooting tree health issues and provide consultation for tree problems that have developed 5-10 years after trees are planted. Understanding what problems are commonly seen is initiation worth knowing when selecting a tree.

The final consideration is the mechanism for how the tree is grown out at the nursery/retailers. (B&B (balled and burlapped), grow bag, and bare root. Potted trees should be in a specialty nursery—potted, B & B (balled and burlapped), grow bag, and bare root. Potted trees should be in a specialty nursery—potted, B & B (balled and burlapped), grow bag, and bare root. (Think of the emerald ash borer with ash trees.) Diversifying trees in a landscape builds resiliency and mitigates the need for treating every single tree when a species-specific problem strikes.)
